[322/363] build/hints.yml

```
# -
#   re: Regular expression of error to search
#   hint: The message of the hint. Optionally, it is possible to use '{}' at the place where the matched group
#         from 're' should be inserted. This requires 'match_to_output: True'. You can use variables with hint messages.
#         For this, you need to add variables and "{}" in a place where you want to put your hint variable, but you can't
#         use 'match_to_output' with variables.
#   match_to_output: (False by default) see the description of 'hint'.
#   variables:
#     -
#       re_variables: [set variable for regular expression]
#       hint_variables: [set variable for hint]
# Rules to write regex for hints on how to resolve errors
# - Do not use more than one whitespace in a row. The script automatically merges several whitespaces into one w
#   hen capturing output
# - Do not use \n in your regex. They are all automatically deletes by the script when capturing output
#
# example of using hints:
# -
#   re: "Error: header {} is missing" (you can use '{1} ... {1}' placeholders in 'hint' and 're', so that y
#   ou don't have to repeat the same variables, you can use 'hint: 'The {0} (functions/types/macros prefixed with '{
#   1}')) has been made into a private API. If users still require usage of the {0} (though this is not recommended),
#   it can be included via #include "esp_private/{2}.h" in this file as an example)
#   hint: "header {} is missing, you need to add dependency on component {}"
#   variables:
#     -
#       re_variables: [Q]
#       hint_variables: [A, B]
#     -
#       re_variables: [W]
#       hint_variables: [C, D]
#     -
#       re_variables: [R]
#       hint_variables: [E, F]
#
# that example will replace this :
# -
#   re: "Error: header Q is missing"
#   hint: "header A is missing, you need to add dependency on component B"
# -
#   re: Error: header W is missing"
#   hint: "header C is missing, you need to add dependency on component D"
# -
#   re: Error: header R is missing"
#   hint: "header E is missing, you need to add dependency on component F"
#
# -
#   re: "warning: passing argument 1 of 'esp_secure_boot_read_key_digests' from incompatible pointer type"
#   hint: "The parameter type of the function esp_secure_boot_read_key_digests() has been changed from ets_secur
#   e_boot_key_digests_t* to esp_secure_boot_key_digests_t*."
#
